

2011 PRODUCT SOURCE BOOKLET

THE MODEL LINE AT A GLANCE:

- FEATURE REFERENCE GUIDE
- COMMON FEATURES
- TRIM LEVEL DIFFERENCES

While the information contained in this book was deemed to be correct at the time of printing, specifications and equipment change. No warranty or guarantee is being extended in this book and Hyundai reserves the right to change product specifications and equipment at any time without incurring any obligation. Information as of June 2011.

DEAR SALES CONSULTANTS:

This booklet helps you understand, present and teach your customers the key operational features of their Hyundai vehicle. In this way, you end up educating your customers—you help them “take ownership” as they become acquainted with their new vehicle’s features:

- **CONSIDER:** If you coach your customer so they have a “hands-on” understanding of how to operate a feature and then test them to make sure they actually can operate that feature, chances are good that the customer will understand how the feature operates and functions. We know that some features of their new Hyundai vehicle do not function as they do on their current vehicle. Having customers “take ownership” of key features will make your job easier and increase customer satisfaction.
- **STOP AND THINK:** If you just show someone how the stalk-mounted windshield wipers and lights operate, once they get behind the wheel, they may not have a clue what to do. But if they physically operate these features, they take ownership. Then, you only have to “test” them a few times to make sure they “get it,” which will make your “selling” job a lot easier and, again, increase customer satisfaction!

Good Learning and Good Selling!

A handwritten signature in black ink that reads 'Gary W. Major'.

Gary W. Major
